

WOOD RAFTER

BANSAL Sales Corporation Pvt. Ltd.

Specifications And Use

Woodrafters are made of HDPS material using recycle waste plastic. We can build a wood effect accent wall without cutting any trees. With an interlocking design, each panel is fitted perfectly in detail and the matching trim mouldings can help with solving the panel-ending problem.

Decorative Slat Wood Panels/ Fluted Wall Panels play a very important role in a modern stylish room. We can use a fluted wall panel as a TV accent wall in the living room, dress up the bedroom wall, update your old wainscoting. We would like to invite you to upload your project photos with a fluted wall panel feature wall.

We offer a large collection of colors and wood finish such as oak wood, maple wood, cherry wood, walnut wood. Each wood finish series have a different level of staining, such as natural clear stain, golden honey, warm chestnut, nutmeg, merlot, Tuscan coffee. We also accept customized colors according to your request.

Installation:

- Panel the wall with either aluminum channels or plywood as the base.
- Fixing the panel: Drill screws on the lower side of the first panel at intermittent distances.
- Overlap the upper side of the second panel on the first panel.
- Again drill the screws on the lower side of the second panel.
- As we repeat the process, screws are hidden and we achieve perfectly consistent panelling.

Advantages of Woodrafters:

- Moisture-proof — perfect for hot and humid environments
- Long-Lasting — Rot proof, No deformation, No wrappingbug-free
- Sophisticated designs and textures, various colours and patterns
- 100% Eco-friendly and recyclable raw materials
- No Hazardous material
- Non-toxic and odourless
- Lightweight

Applications:

- Wall Coverings for inside and other interior applications
- Residential and Commercial Spaces
- Hotels, Meeting room, Wedding hall , Living room etc.

WOOD RAFTER

An aerial photograph of a marble quarry. The site features several large, rectangular blocks of light-colored marble with dark veining. A yellow bulldozer is positioned on the left, and another is on the right. A small white building with a blue roof sits on the left side. The ground is covered in dirt and some smaller marble fragments.
