# Certification

## Top Grade Healthy Building Material

Water-based adhesive is applied for meticulous care.

Stop worrying about the smell of adhesive after the installation.

By applying water-based adhesive,

Bodaq Interior Film has the highest level of harmlessness in the industry.

Interior film, which is widely used in households,  
must be certified for the interior mark from the **Ministry of Environment**.

(Applied to multi-use facilities such as apartments from December 23, 2016)

Hyundai L&C Bodaq Interior Film **has applied water-based adhesive to obtain the top grade of the HB mark.**

With its authorized eco-friendliness,  
Bodaq is the best option for the health of your family.

## Environment

### We pay attention to nature

Hyundai L&C's Bodaq is an eco-friendly film that cares about healthy environment.

- Free from harmful heavy metals [lead, cadmium, mercury, hexavalent chromium, etc.]
- Formaldehyde [HCHO] the substance that causes sick house syndrome, is not released.
- Minimized release of volatile organic compounds [TVOC, toluene, etc.]
- It meets the safety standard [KF mark standard] applied to wallpaper and paperboard.
- Meets the safety requirements for hazardous chemicals in the Common Safety Standards of Children's Products.
- Excellent antimicrobial and anti-mold function, which helps to maintain a pleasant surrounding environment.

Heavy Metal [Pb, Cd, Hg, CrVI]		Formaldehyde [HCHO]		Phthalate	
Standard — [ Pb ] 5mg/kg [ Cd ] 0.5mg/kg [ Hg ] 2mg/kg [ CrVI ] 1mg/kg	None detected	Standard — 0.12mg/m <sup>3</sup> ·h	None detected	Standard — [DEHP] less than 0.1% [DBP] less than 0.1% [BBP] less than 0.1%	None detected

Hazardous chemicals' criteria for the **Common Safety Standards for Children's Products**

Hazardous Substances [Sb, As, Ba, Cd, Cr, Pb, Hg, Se]	
Standard — [ Sb ] 60mg/kg [ As ] 25mg/kg [ Ba ] 1000mg/kg [ Cd ] 75mg/kg	Satisfactory

## Safety

### We pay attention to Safety

Bodaq is a safe interior film that can be used in any environment with excellent flame retardancy and quality stability.

Flame Retardancy		Stain resistance	
[Certified by the Korean Fire Industry Technical Institute]		No Stain	
Carbonization length less than 20cm		No Stain	
Carbonization area less than 30cm <sup>2</sup>		No Stain	
Flame retardant certification less than 3sec		No Stain	
Smoke density 200 Ds		No Stain	

If you have any inquiry regarding certificates, company introduction references, installation guides and more, please contact us through the head office or a local distributor.

# 01

## Natural Surface

A dramatic space highlighting the attractiveness of natural materials through a unique texture.

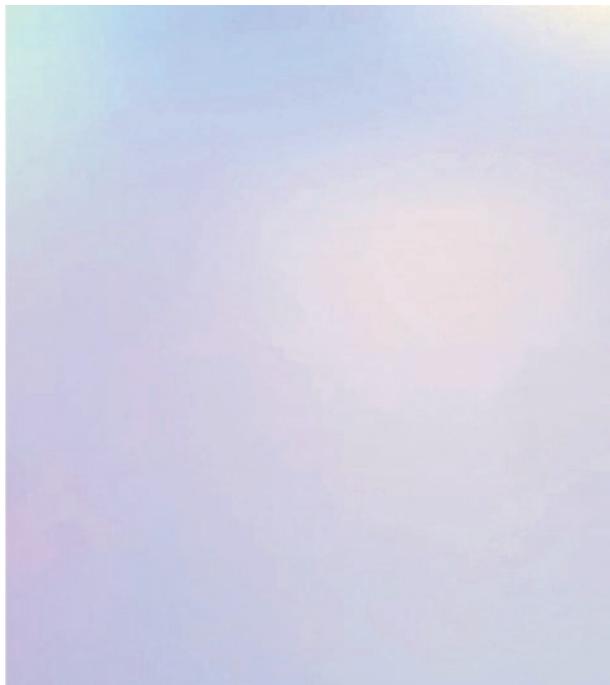

Bodaq NS series is the premium line of products that reinterpreted various textures and colors from nature, such as stone, fabric and metal, from a modern perspective.

The natural but occasionally classic atmosphere will dramatically change your space.

# UMI Hologram

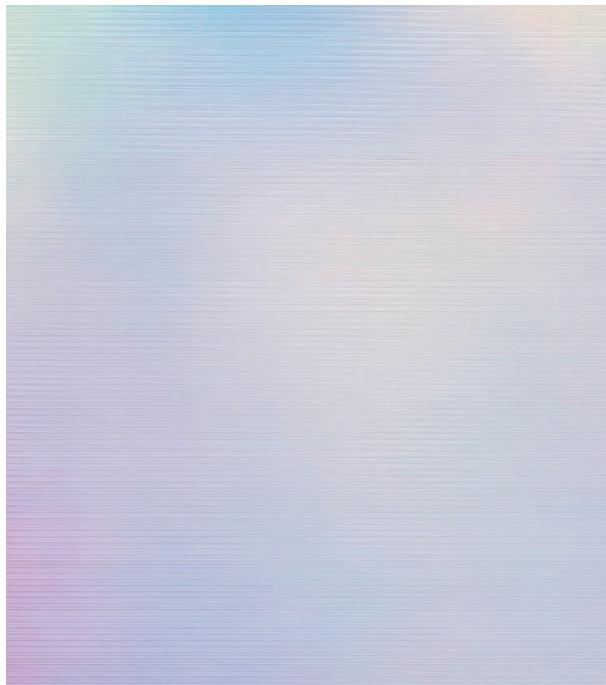

The pinnacle of modernism completed with light. Feel the glamorous charm of UMI metal, which expresses the beauty of metal in the most abundant way. By applying the innovative UMI (UV Micro Imprinting) method that has not been seen in conventional metal film products, high-brightness metal surfaces are realistically realized. Also, experience the mysterious and surreal sense of space through the colorful sense of color that changes depending on the angle of the newly introduced UMI hologram.

## Stone & Marble

PM017 · PNC50

Identical structure, identical in size. But once the door opens, a completely different space is revealed.

The difference is all in the interior! From a place that everyone knows to a place everyone wants to live in.

Upgrade your interior with Bodaq Stone & Marble one that will make you feel like you made the right choice even with the smallest element.

※ The above image is for illustrational purpose only, and the real product may be different.

## Premium Marble

The marble pattern, which has been consistently loved for its elegant charm, is upgraded to a more realistic look.

Premium marble adds visual satisfaction by applying innovative coating technology to the existing marble surface.

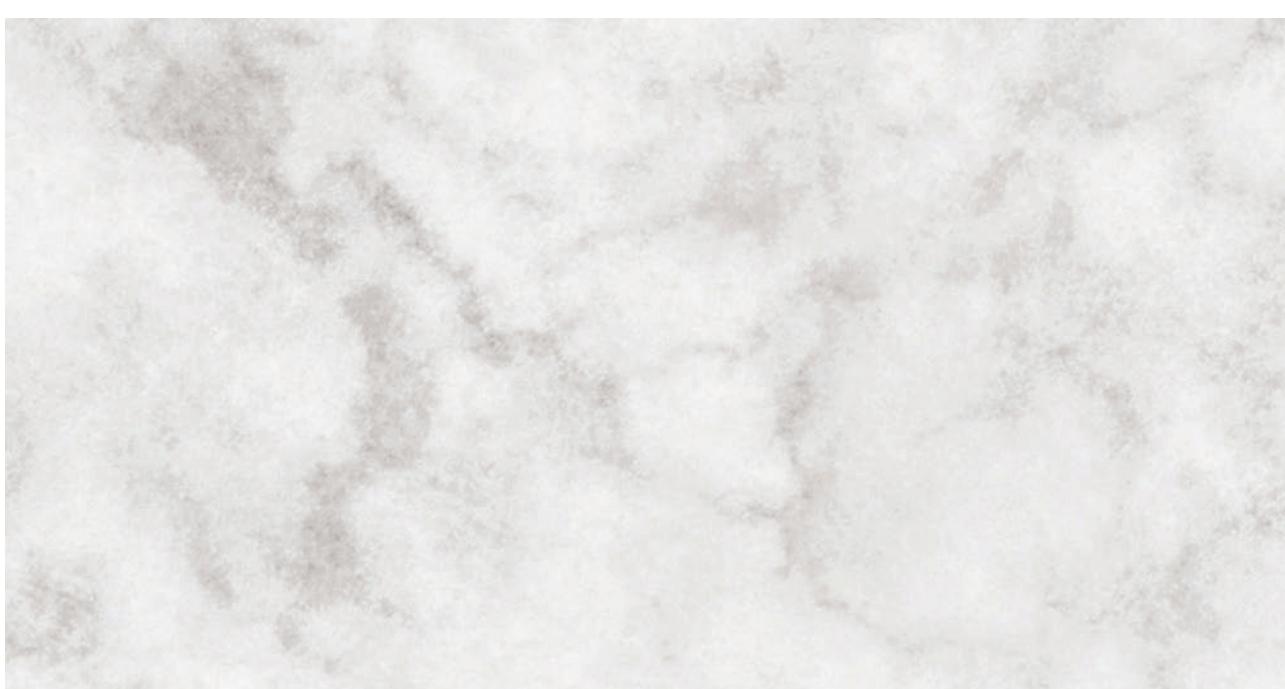

The surface of the stone sanded with powder like satin is realistically realized, giving it a luxurious feel to the touch.

## Wood

SPW90

Variety of changes made with wood full of sensibility. Wood which never goes out of style is an element that matches every space.

It is the most fundamental yet the most wide-ranged item.

We invite you to the world of wood which always presents a new interpretation of the familiar grain,  
color and texture. A majestic tree now decorates your space.

# Origin Wood

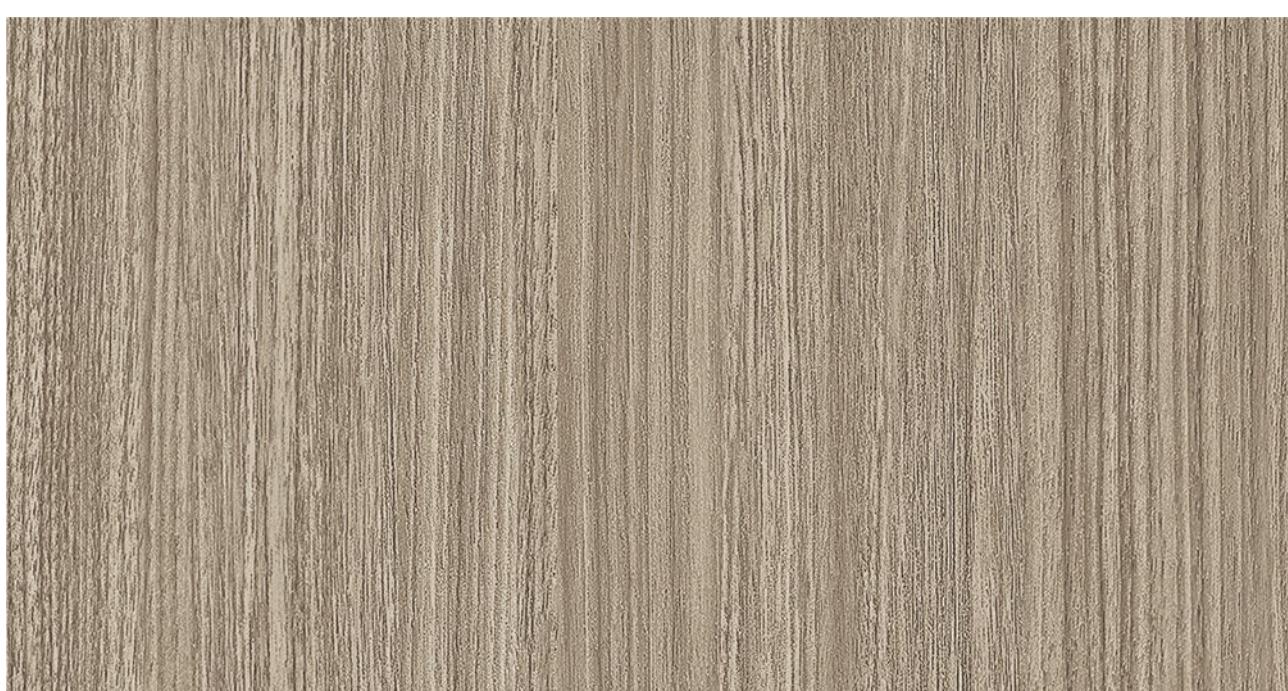

We present the SPW series, which is more than wood, and has been perfectly reproduced with Bodaq's unique technology and premium design. Experience a new level of premium finish with a solid texture and natural feel close to real wood!

# HYUNDAI L&C **Bodaq** INSTRUCTIONS FOR INSTALLATION

## Preparation

- Check the condition of the film and the object's surface before application.
- The adhesion and stability highly depend on the density of the surface. Therefore, in case of MDF, uniform density is recommended.
- Please be aware of the followings before surface preparation:
  - If the surface is rough, such as MDF or PB, clean the surface and make it even with sandpaper before installation.
  - If sandpaper is used on ABS doors, the surface may become uneven. Please refrain from doing so.
  - In case of installing on ABS doors, avoid using sandpaper, for it might cause rough surface and air bubbles.
- Color differences may occur between products(due to printing LOT). Avoid mixing LOT during installation.
- Please note that long-term exposure to low temperatures may cause cracks on the film's surface and weakening of adhesive strength.
- Please note that if there are wax-based materials on object's surface, the adhesive strength will decrease.

## Primer Treatment

- We recommend using primers produced by Hyundai L&C to ensure the best attachment quality and stability.
- Wood materials such as MDF and PB have a very high primer absorption rate. In the case of the facet, please apply 2 to 3 times.
- Primer must be sufficiently dried for at least 2 hours after application. Afterwards, please attach the film with moderate pressure.  
(Store water-based primer in a shaded, room-temperature environment. Frozen primer cannot be used, so be careful about storing it in winter.)

## Installation

- During on-site installation in the early morning of spring/autumn, the room temperature(15°C~23°C) must be maintained to remove moisture remaining on the wall.
- SPW / SMT / UMI / PNC series have special coating on the surface, so they must be installed in an environment where room temperature is maintained.
- Overlapping attachment must be done after primer is applied and dried. Then finish the attachment with extra force.
- Sufficient pressure must be applied to the edge to prevent peeling off.
- Avoid moisture and direct sunlight when installing, and do not use Bodaq Interior Film outdoors.
- After installation, room temperature should be maintained at least for 2 days.

## Precaution: Special Patterns

### SPW series(premium glossy/matt mixture) / PNC series(deep embossed concrete)

- Special care should be taken when attaching the film on the edge area, as strong bending of the film may damage the surface coating.
- Deep embossing is applied for a realistic texture. Frequent attachment and detachment of the product may cause tearing.
- Use neutral detergent or water when cleaning the film's surface after installation.

### SMT series(matte special coating)

- Because of the special coating, it can be difficult to push during installation.
- Please install the film in a clean environment in order for installation quality.
- Due to the special structure, it cannot be restored if the film is wrinkled during application. Please be very careful when storing and using it.
- Due to its hardness, bending and overlapping application may be difficult.

### RF series(Woven Fabric)

- Surface scratches may occur when using sharp installation tools.
- Because of its thickness, cutting, bending and overlapping application may be difficult.
- Since there is no surface film layer, special care must be taken not to damage the film when using tools.

### UMI series(premium real metal)

- Please install the film in a clean environment in order for installation quality.
- Due to the special structure, it cannot be restored if the film is wrinkled during application. Please be very careful when storing and using it.
- Due to its hardness, bending and overlapping application may be difficult.

### HS series(high gloss)

- Due to its hardness, it is necessary to finish the application with sufficient force to prevent peeling off.

### TNS series(Deep Emboss Leather)

- Due to its thickness, sufficient pressure must be applied during bending and overlapping application.

※ Bodaq Interior Film test reports are available by contacting the headquarter or official distributors.

Headquarter: Hyundai L&C Décor Overseas Sales Team
